**Catalogue 2018**

**Herbs, Perennials, Fragrant plants, Medicinals, Rockery and Shrubs**

The plants listed in this catalogue are all grown by us at an exposed location at 300m, 2km from the ocean. The garden receives no additional watering, only rainfall, so is dry in summer and autumn, but can be very wet in winter and spring. We also grow a wide range of plants indigenous to the Otway Ranges forest and coast. Please contact us if you would like a list of Otway species. We use biodynamic practices in the nursery and garden.

As many plants are grown in small numbers please list alternatives, unless otherwise advised we will select substitutes. If we cannot fill the order we will refund or credit to \$10. The plants will be packaged and labelled with utmost care and although we do not accept responsibility once plants have left us we will do our best to rectify any problems.

Plants will be sent by post on Monday unless you make alternative arrangements. Please include payment and postage with your order. If you wish to be included on our mailing list please include 3 x 70c stamps or \$1.50 for our next catalogue. Plants may only be available in one size, if so we will supply that size and adjust the price accordingly, unless advised.

We do not send to Tasmania, Western Australia or Northern Territory.

c.= culinary f.= fragrant m.= medicinal p.=perennial r.= rockery s.= salvias sh = trees & shrubs

Postage Rates. Victoria. S.A & N.S.W. add \$4.00 QLD. add \$6.00
