**Catalogue 2019**

**Herbs, Perennials, Fragrant plants, Medicinals, Rockery and Shrubs**

The plants listed in this catalogue are all grown by us at an exposed location at 300m, 2km from the ocean. The garden receives no additional watering, only rainfall, so is dry in summer and autumn, but can be very wet in winter and spring. We also grow a wide range of plants indigenous to the Otway Ranges forest and coast. Please contact us if you would like a list of Otway species. We use biodynamic practices in the nursery and garden.

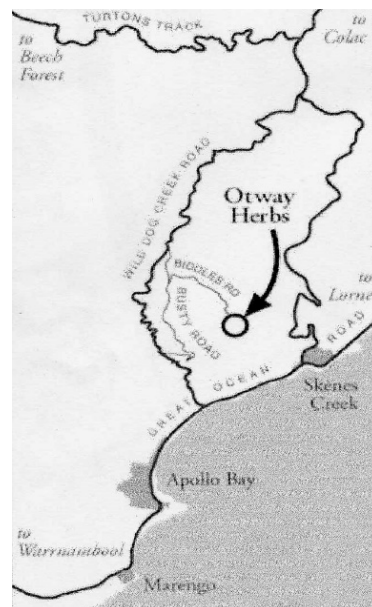

As many plants are grown in small numbers please list alternatives, unless otherwise advised we will select substitutes. If we cannot fill the order, we will refund or credit to \$10. The plants will be packaged and labelled with utmost care and although we do not accept responsibility once plants have left us we will do our best to rectify any problems.

Postage will be charged at cost. Plants may only be available in one size, if so we will supply that size and adjust the price accordingly, unless advised.

Plants will be sent by post on Monday unless you make alternative arrangements. Please include payment and postage with your order. We do not send to Tasmania, Western Australia or Northern Territory.

Prices are as follows. s. 75cm pots \$4.50. 125cm pots \$9.00 unless otherwise marked.

The nursery and garden are open daily from 9am to 5pm, the views are superb children are welcome, and we are happy to give advice on planning and selection. Follow the signs from the Great Ocean Road, four kms east of Apollo Bay, up Wild Dog and Busty Rds.
